Not only is Sam Galante Junior Gisbar but also a Shimshonim girls' Madrich. Aged 16 he is at Prince Edward High School. He sees himself becoming either an Engineer or an Architect. Next year he hopes to participate in a course in Israel.

The Shimshonim girls form a dynamic group of twenty, which has become so popular that its membership is still increasing. Large differences in outlook exist amongst a few members of the group but there is nonetheless a great deal of unity. The majority of the group are extremely intelligent and all of them are potential leaders of the movement. The group follows a set Tochniet from South Africa, although it is necessary at times to break away from it as it also has to cater for new members. These girls are eager to learn more about Israel and Betar and always participate in discussions. Several outdoor functions throughout the year were predictably well attended.
